

Assignment

Bootstrap Front Page for ShopSabroso.pk

Design and implement the front page of ShopSabroso.pk using Bootstrap. Emphasize the use of different Bootstrap components, such as carousels, drop-downs, and cards. Additionally, create a responsive layout for optimal viewing on both desktop and mobile devices.

Instructions:

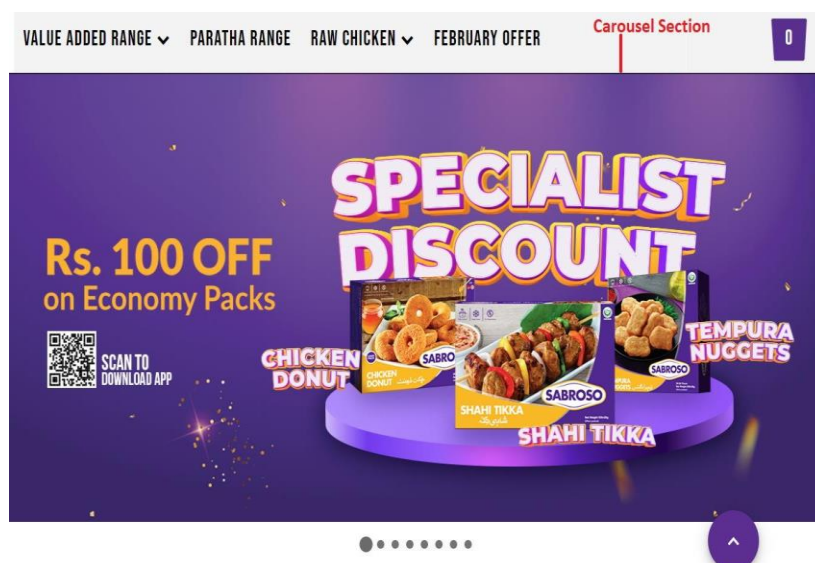

1. Assets and Reference Screenshots:

- You will be provided with all necessary assets (images, logos, etc.) for the ShopSabroso.pk website.
- Refer to full-page screenshots for both desktop and mobile layouts as a visual guide

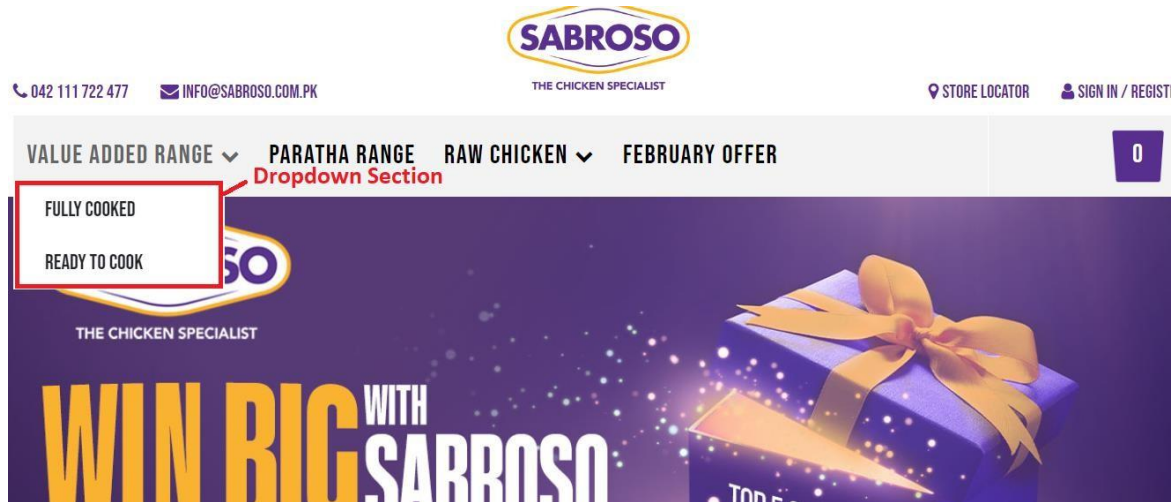

2. Bootstrap Components:

- Implement a Bootstrap carousel showcasing featured products on the front page.

Carousel Section:

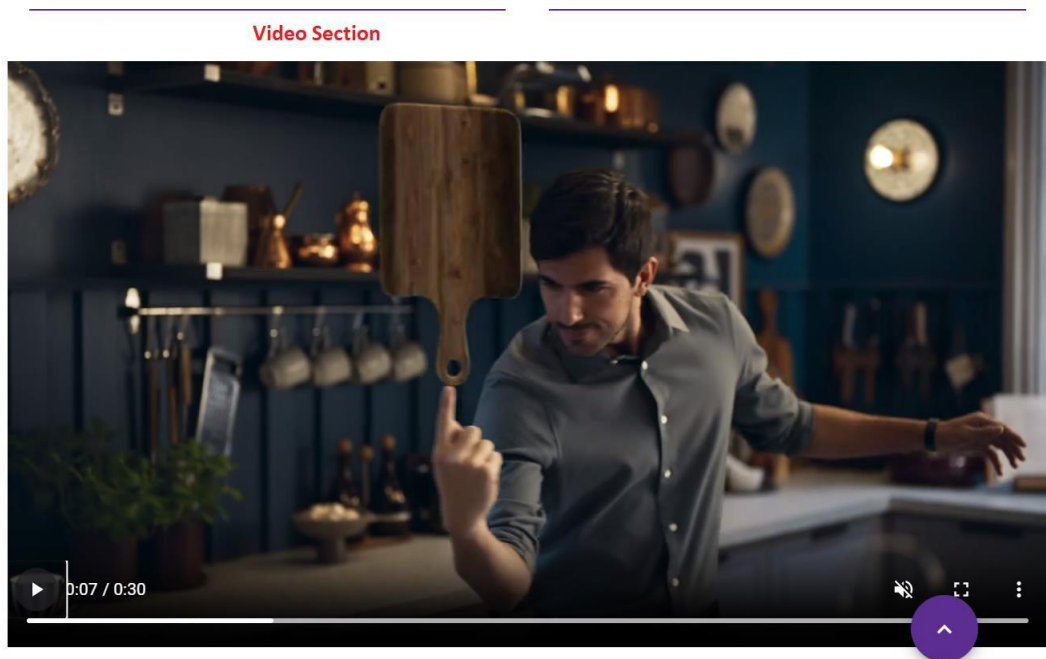

Utilize Bootstrap drop-downs for navigation or categorization of products.

- Include a section with Bootstrap cards displaying various products available on the website.
- Implement a video section using Bootstrap, where a promotional video for ShopSabroso.pk can be embedded.

Video Section:

1. Responsive Design:

- Ensure that the front page is responsive and looks visually appealing on both desktop and mobile devices. For making layout responsive you can use bootstrap grid layout based classes.
- Consider the use of Bootstrap's grid system to create a fluid and flexible layout.

2. Styling and Branding:

- Apply appropriate styling and branding to maintain consistency with the ShopSabroso.pk brand.
- Pay attention to color schemes, typography, and overall aesthetics.

3. Submission:

- The student should submit the HTML, CSS, and any necessary libraries in a zip file format.

Include comments in the code to explain the purpose of different sections and components.
